

BURST

At the cutting edge of DSL technology, BURST can achieve download speeds of 20 Mb/s. Also capable of uploads speeds at 2 Mb/s this is an enterprise grade service.

BURST is a refinement of the ADSL2 standard and uses a greater range of the available frequencies to substantially increase the transmission speeds of typical ADSL connections.

BURST is currently available across London and major cities nationwide, with an aggressive roll out plan across the UK underway.

Product Summary

Speed: Up to 20 Mb/s download and 2 Mb/s upload

Lead time: 10-14 days

Contract term: 3 months

Billing: Quarterly or annually

SLA: 99.9% SLA on network availability, standard ADSL support

Support: 24/7 support, 365 days a year

IP addresses: Free static IP address allocation

Hardware: BURST capable router

BURST is also the perfect addition to Fluidata's PureFluid range, offering an aggregated solution which combines the ultra-fast BURST to a dedicated uncontended SDSL backbone.

The result is a market leading product capable of up to 20 Mb/s download and 4 Mb/s upload. The nature of the product also ensures redundancy, with true failover between 2 copper circuits and independent wholesale delivery both at the local exchange and into the Fluidata core network.
